ASCE (Assurance and Safety Case Environment) is a powerful, flexible and intuitive software system for the development and maintenance of assurance cases and the delivery of assurance case reports.

User training and knowledge transfer are key to any successful software implementation. Well trained users adopt and accept new software faster and as a result, have the potential to increase their productivity.

Why invest in ASCE Training?

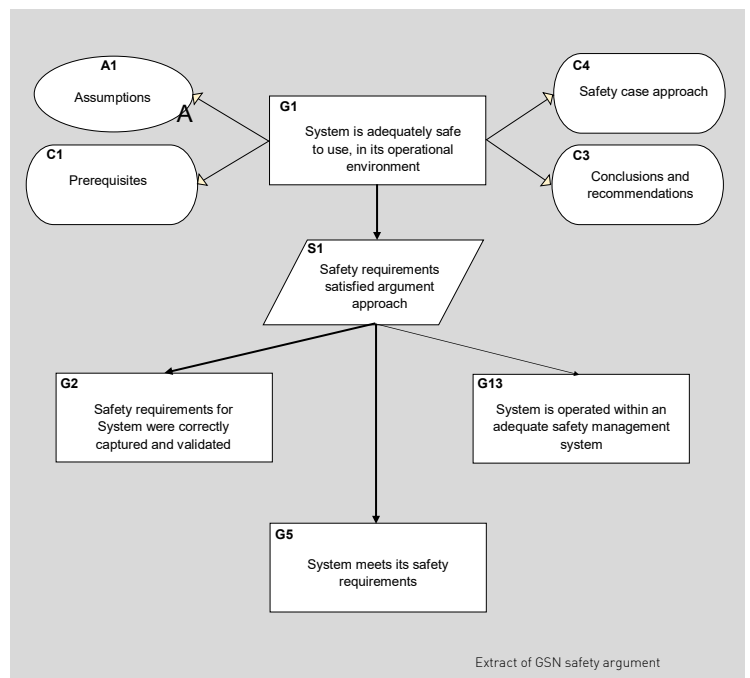

- To ensure that you get the maximum from your investment in ASCE.
- To build knowledge, competence and confidence to achieve personal and company objectives.
- To learn how to configure ASCE so that it works for you in your environment.
- To understand how to develop Claims-Argument-Evidence, and Goal Structuring Notation (GSN) arguments in ASCE.
- To use ASCE to communicate more effectively with your customers and stakeholders.

To register

Please request a booking form by emailing enquiries@adelard.com or downloading from adelard.com/training

Course tutors

All course tutors have extensive experience in the use of ASCE for assurance case construction and collectively have delivered ASCE and assurance case training at more than 50 organisations. Each course is limited to 8 delegates to ensure a high tutor/delegate ratio.

*Includes course notes and a certificate of attendance. For Adelard hosted events lunch and refreshments will be provided.

Foundation course

Learning outcomes

- To become familiar with the assurance case approach
- To become a practitioner in using the main ASCE features for assurance case development
- Training includes a number of practical hands-on exercises
